Address

004, B2, Anita Residency, Katraj
Kondhwa Road, Katraj, Pune -
411046

Education

Bachelor of Technology - BTech, Computer Science and Engineering (Artificial Intelligence)

Vishwakarma Institute Of
Technology
September 2024 - Present

Language

- English
- Marathi
- Hindi

Skills

- Programming & Web Technologies:
 - Python (including File Handling)
 - HTML
 - CSS (Cascading Style Sheets)

About Me

Motivated and detail-oriented computer science student with a strong foundation in AI and a passion for solving real-world problems through technology. Committed to continuous learning and eager to contribute to workplace culture of innovation and excellence in delivering impactful digital solutions.

Extracurricular Activities

2024
-
Present

Corporate Relations Volunteer

Computer Society of India, VIT Pune

- Developed and maintained relationships with corporate sponsors to secure funding and support for community initiatives.

2024
-
Present

Multimedia Coordinator

SIG - RealitySpectra, VIT Pune

- Collaborated with team members to create visual marketing materials, increasing club recognition in the college and companies.

Projects

Leveraging ML to Address Speech Challenges

Developed an AI-driven solution to identify speech impairments in young children, enabling early intervention.

- Designed a pipeline to collect 5-second voice samples and extract audio features (pitch, tone, cadence) using Librosa for spectrogram generation.
- Built and trained a TensorFlow-based Convolutional Neural Network (CNN) to detect speech anomalies, achieving 93% training accuracy and 90% validation accuracy.
- Created a user-friendly Streamlit interface for seamless interaction.
- Demonstrated reliable performance across diverse datasets, with applications in speech therapy, early childhood education, and healthcare.
- Current Status: Proof of Concept (POC) completed; refining for production deployment and enhanced real-world functionality.

- JavaScript
- Flask
- Data & AI:
 - TensorFlow
 - Scikit-Learn
 - Convolutional Neural Networks (CNN)
 - Data Cleaning
 - Data Analysis
 - Regression Analysis
 - Predictive Modeling
 - Artificial Intelligence (AI)
 - Machine Learning
 - Computer Vision
 - textblob
 - Google Ads
 - Data Engineering
 - Microsoft Excel
- Tools & Creative Media:
 - Canva
 - Adobe Photoshop
 - Adobe Illustrator
 - Adobe Lightroom
- Robotics & Networking:
 - Robotics
 - Robot Programming
 - Networking
- Soft Skills & Others:
 - Communication
 - Public Relations
 - Corporate Relations
 - Problem Solving
 - Customer Relationship Management (CRM)
 - Creative Media
 - Allyship
 - Affinity Groups
 - Employee Resource Groups (ERG)

Harmony-Bot

Engineered an advanced chatbot using Flask and NLP for dynamic, context-aware conversations.

- Implemented sentiment analysis and customizable knowledge base using Python, spaCy, TextBlob, Scikit-Learn, and NumPy.
- Developed a responsive interface with secure sign-in, guest access, and autocomplete features.
- Prepared for deployment on Heroku, AWS, or Azure, suitable for business and developer use cases.

Certifications

- Executive Guide to Predictive Modeling Strategy at Scale
- Create a Google Ads Search Campaign
- Data Engineering Foundations
- The Value of Employee Resource Groups
- Basics of Python
- Python Foundation Certification
- Robotics Course
- Introduction to Data Structure and Algorithm
- Data Analysis Using Excel
